

The Federal Railroad Administration is taking public comments about autonomous trains operating with no crew members on board!

No Conductors
+No Engineers
+No Crews On Trains
= Catastrophic Danger

- Would you ride on an airplane or ship without a crew?
- Crewless trains would be transporting chlorine gas, ammonia gas, toxic chemicals, and explosive oil through all our communities!
- In 2017 railroad industry *NET* profits were \$37.6 billion, yet they still want more! This is all about insatiable greed prioritized over public safety, NOT transportation industry competitiveness.
- Tell the FRA autonomous trains are a threat to public safety and you oppose crewless trains.
- Keep our communities safe. **STOP** crewless trains!
